

Making every drive better™

Safe driving campaign

EURAF EHS Team

APR 2026

Facts about driving

- According to the WHO report on global road safety, 3,000 people die every day in traffic accidents. Between 20 and 50 million are injured every year, and 1.3 million people lose their lives. This figure is expected to rise to 2.4 million traffic fatalities per year by 2030. Traffic accidents are the number one cause of death among 15- to 29-year-olds.
- Only 57% of countries require seat belts for all seats in cars.
- In Tunisia Seat Belts are mandatory for the driver and **ALL PASSENGERS** since April 2017
- Seat belts protect 40-50% of accident victims in the driver's and front passenger seats from serious injuries. In the rear seats, this rate ranges between 25 and 75% depending on the impact, seating position and vehicle type.

SEAT-BELTS: THE FACTS

Wearing a seat-belt reduces the risk of a fatal injury by:

- Conclusion: All car manufacturers must install seat belts in all seats of a car. However, the mandatory use of seat belts is not always regulated by law.

The Most Common Causes of Car Accidents.

- DISTRACTED DRIVING
- DRUNK DRIVING
- DROWSY DRIVING
- AGGRESSIVE DRIVING & ROAD RAGE
- SPEEDING & TAILGATING
- RECKLESS DRIVING
- POTHOLES & ROAD HAZARDS
- DANGEROUS WEATHER
- UNSAFE LANE CHANGES
- WRONG-WAY DRIVING
- TIRE BLOWOUT ACCIDENTS

DISTRACTED DRIVING

Ensure full driver attention at all times

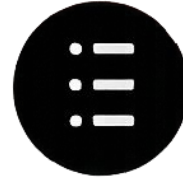

SOURCES OF DISTRACTION

- Mobile phone use
- Eating or drinking
- Adjusting the radio or GPS
- Talking to passengers
- Reaching for objects

BEFORE DRIVING

- Complete pre-trip planning
(*set GPS, adjust mirrors, set climate controls*)
- Secure loose items
- Finish eating or drinking
- Minimize distractions before starting the vehicle

WHILE DRIVING

- No handheld phone use
- No texting while driving
- Follow traffic laws
- Follow company policy
- Stay focused on the road — avoid daydreaming and multitasking

GENERAL REQUIREMENTS

- Keep both hands on the wheel
- Do not text or type
- Use hands-free technology only when absolutely necessary
- Keep your attention on the road at all times

CAR INSPECTION

To ensure that the car is in good conditions before driving

EXTERIOR CHECKS

Tires

Check pressure, tread depth, look for cuts or bulges

Lights

Headlight, brake lights, indicators – all working

Mirrors & Windows

Clean, properly adjusted, free of cracks

Bodywork

Look for damage that could affect safety

INSIDE THE VEHICLE

Brakes

Test foot brake and parking brake

Steering

No unusual resistance or noise

Horn

Functional

Seatbelts

Working and not frayed

Dashboard Warning Lights

None should remain on after starting

SAFETY EQUIPMENT

First Aid Kit

Present and complete

Fire Extinguisher

Charged and accessible

Spare Tire & Tools

Jack and wrench

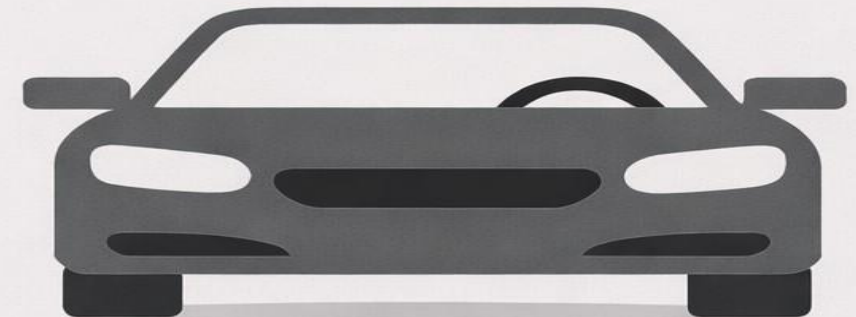

OPERATIONAL CHECK

Start engine and listen for unusual noises

Check for leaks under the car

Respect the speed limits

1. Check your speedometer regularly, especially when leaving high speed roads
2. Know the limits - look for signs, especially at junctions
3. Remember, speed limits are a maximum, not a target
4. 20's plenty when kids are about - and may even be too fast
5. Try no higher than 3rd gear in 30 mph limit
6. Recognize what makes you speed- keeping up with traffic, overtaking or being tailgated
7. Concentrate - distracted drivers speed
8. Slow down when entering villages
9. Give yourself time - there's no need to speed and you won't get there quicker

An abstract graphic on the left side of the slide. It features a dark blue background with a pattern of small, glowing blue dots. These dots are arranged in a way that creates a sense of depth and movement, resembling a 3D wireframe or a digital landscape. The dots are more densely packed in some areas, forming a wave-like shape that curves across the frame.

Thank You
